

# ioSafe

## ioSafe, the world's most optimal harddisk

ioSafe is the safest, most advanced fireproof and waterproof external hard drive in the world. The ioSafe offers unmatched data protection for your digital life, your memories, media and documents. The patented technology has been offering protection against fire, water, theft and vandalism since 2005. With the ioSafe you have a hard disk that offers physical protection and safety to irreplaceable data as if it was a black box. Encryption and network security only offer software related protection. To that, the ioSafe adds protection against fire and water.

### The strength features

- Fire resistant Plug 'N' Play
- Water resistant SSD
- Sata/USB 2.0/3.0 Smart cooling
- Suitable for network surroundings
- To anchor with Kensington lock

### Physical protection

We often think too lightly about physical protection. The ioSafe is developed to protect data in every situation. The ioSafe can be bolted down to the floor for protection against theft; it is designed to survive a collapsing building, which might occur during or after a fire.

### Data transfer

ioSafe offers every tool to transfer your data from a conservative hard disk, that does not offer any protection against fire, water or theft.
