

CHUBBSAFES AlphaPlus Safe £3K Rated

Description

This durable safe is constructed with a 6mm steel door fitted with hardened steel plates to protect the boltwork and lock against drilling. The double walled construction consists of 3mm outer steel, 2mm steel inner body with an overall wall thickness of 40mm. The cavity between the inner and outer body is filled in between with a fire retardant material. The safes are available with either a double bitted 8 lever key lock or Chubb's own programmable electronic lock.

£3,000 Cash Rating

Heavy Item (may incur delivery costs)
